Points for Attention

1. You can't connect multiple Cameras to the computer or intelligent device at the same time, including the native device, or else a squeak may appear during the call.
2. It is required to connect the USB cable directly to the USB interface of the computer device. It may cause operation problems if it is connected through the USB hub.
3. Check whether the device driver is installed and connected successfully: check whether the default device displays "native device model" in the options of playback (output) and recording (input) of the sound and audio device properties of the computer control panel option, if not, re-select "Native device model" and confirm.
4. When use, it can adjust the volume through the speaker option on the computer if necessary. When using instant messaging or Internet phone application software, please set the device of the model as the preferred audio device.
5. Do not repair the device by yourself or else it may cause electric shock. Please contact your seller if there is any problem needing repair.
